

Rooftop solar panel manufacturer in Aarhus Denmark

Overview

What is Danish solar energy?

Danish solar energy releases the world's most efficient selection of colored solar modules. This ingenious technology is especially interesting for the building industry, where solar energy can be integrated 100% in the building so that roofs and facades in practice become energy producing.

What is the first solar facade in Copenhagen?

THE FIRST SOLAR FACADE AT A LISTED BUILDING IN COPENHAGEN. A beautiful facade solution with red high-efficiency CFR solar cells in one of Copenhagen's many red stone properties. The first first red solar cell facade solution in Copenhagen, and probably the first in the world.

When will a solar power plant be built in Denmark?

The establishment of the construction site has just begun and is expected to be completed in December 2024. Solar power plants with a similar production size are usually only seen carried out as solar farms on the ground here in Denmark, and you have to look abroad to find similar projects carried out on industrial roofs.

Will Gigafactory power a new solar plant in Denmark?

But even in comparison with the largest projects seen abroad, including Tesla's Gigafactory in Nevada, the electricity production from the solar plant in Horsens, Denmark, will exceed the existing installations in the world.
