

# **Scalable Installment Payment Options for Dutch Mobile Energy Storage Containers**

## Overview

---

How much does the Dutch government pay for battery storage?

The Dutch government has earmarked €100 million (\$106.7 million) of subsidies for the deployment of battery storage alongside PV projects. The funds are part of a €416 million subsidy program announced last year to alleviate grid congestion.

Will the Netherlands support battery storage in solar PV projects?

Netherlands recently announced €100 million in subsidies for the development and integration of battery storage in solar PV projects covering about 160-330 MW for 2025, in response to emerging challenges related to grid constraints and renewable integration in the country.

Is the Netherlands a good place to invest in battery energy storage?

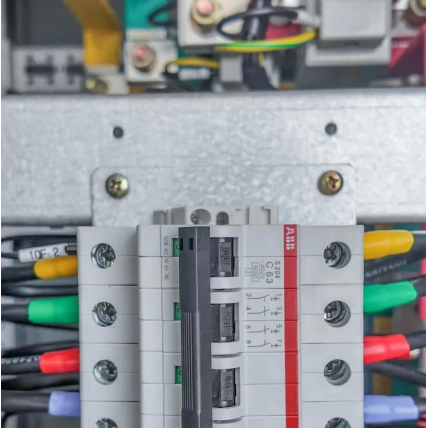

The Netherlands offers attractive revenue potential for Battery Energy Storage System (BESS) projects, thanks to a growing share of cheap renewable power sources combined with expensive gas-powered plants, resulting in relatively high price volatility on the electricity markets.

Why did the Dutch government grant €100 million to solar PV projects?

Image for representation purposes only. The Dutch government recently announced €100 million in subsidies for the development and integration of battery storage in solar PV projects covering about 160-330 MW for 2025, in response to emerging challenges related to grid constraints and renewable integration in the country.
