

# **Sending batteries resulted in the site being fined**

## Overview

---

Are lithium batteries dangerous goods?

As all lithium batteries are considered dangerous goods, regulations are in place to ensure their safe transport. It is essential to understand how to send battery properly. This portal provides the resources you need for sending and importing lithium batteries safely and in compliance with current IATA dangerous goods regulations. Rechargeable.

Why is battery shipping dangerous?

However, their high energy density, combined with their flammable electrolyte and risk of short-circuiting, makes them a hazardous material during transportation. Fires and explosions linked to improper battery shipping have led to increasingly strict regulatory oversight across the globe.

Are wet batteries safe to ship internationally?

Like lithium batteries, there are strict regulations to follow when shipping wet batteries internationally. An IATA Dangerous Goods label must be attached, along with the correct UN number and shipping name for the particular type of batteries.

How can organizations safely navigate the world of lithium battery shipping?

By staying informed, proactively updating processes, and working with experienced logistics providers, organizations can safely navigate the complex world of lithium battery shipping and avoid costly delays, fines, or accidents. Learn lithium battery shipping rules for the U.S., China, U.K., Germany, Japan, Australia & Canada.
