

Senegal Solar Container Container Ultra-Large Capacity Bulk Procurement

Overview

Is a solar energy project in Senegal the biggest in West Africa?

Work on a solar energy and battery storage project in Senegal, touted to be the biggest in West Africa once it goes live, is set to begin next month after an EPC (Engineering, Procurement and Construction) contract for its development was recently signed. The Kolda project will encompass a 60MWp PV solar plant coupled with a 90MWh storage system.

When will a solar power plant be built in Senegal?

“This agreement paves the way for the construction to begin in May 2025, with the deployment of a 60MWp photovoltaic plant coupled with a 90MWh storage system.” Voltalia is to supply the PV infrastructure for the solar power plant, which will operate on Senegal’s national grid managed by SENELEC.

Is Senegal achieving universal energy access?

With a national electricity access rate of 84%, Senegal is making progress towards universal energy access, yet more than 30% of rural communities remain disconnected from the grid.

Why do African countries start RFPs for solar and storage projects?

AFSIA’s Africa Solar Outlook 2025 report pointed out that an increasing number of African countries are starting Requests for Proposals (RfPs) for projects including both solar and storage, as there is a growing understanding of the technical advantages of storage as well as its price evolution.
