

# Shanghai off-grid solar power generation system

## Overview

---

What's going on with offshore solar power in Shanghai?

An offshore PV company's booth is seen during a solar power expo in Shanghai in June. [CHINA DAILY] Shanghai will begin the first round of selections for offshore solar power generation projects with a minimum scale of 1 million kilowatts by the end of this year, according to the Shanghai Municipal Development and Reform Commission.

Will Shanghai start a solar power project?

Shanghai will begin the first round of selections for offshore solar power generation projects with a minimum scale of 1 million kilowatts by the end of this year, according to the Shanghai Municipal Development and Reform Commission. The move is part of the country's stepped-up efforts to promote the development of offshore solar energy.

Why is China launching offshore solar energy projects?

The move is part of the country's stepped-up efforts to promote the development of offshore solar energy. The selected projects will have assured integration of solar power to the grid instead of trading in the electricity market.

Can offshore photovoltaics boost China's economic growth?

Experts said there is significant growth potential for offshore photovoltaics, which leverage vast ocean areas and abundant sunlight to overcome land limitations and provide a new platform for solar power generation. Offshore photovoltaics also ease energy supply pressures in the eastern regions of China, and boost economic growth.
