

Singapore New Energy Charging Station

Overview

Allgreen Properties, a real estate developer based in Singapore, is setting up the country's largest public charging hub. This facility will simultaneously serve 55 EVs when it opens in mid-December. Where are shell EV charging stations located in Singapore?

2 Three Shell service stations located in Tampines, Pasir Ris, and Lakeview will provide electric vehicle (EV) charging using 100% certified renewable energy, including energy from the solar panels at the rooftops of these stations and other Shell rooftops across Singapore.

How EV charging is transforming Singapore's Energy Transition?

By integrating the EV chargers with the BESS and renewable energy from the rooftop solar PV system, Shell can alleviate the constraints of the electrical grid, and deploy more high-powered EV charging points to support Singapore's energy transition. Drivers also enjoy more choices when it comes to smart charging and decarbonisation.

Does Singapore have an electric vehicle charging infrastructure?

Singapore's electric vehicle (EV) charging infrastructure is expanding steadily across public HDB carparks and private premises, sustaining the momentum of our transition to cleaner energy vehicles.

Which service stations in Singapore offer the fastest EV charging speed?

Three Shell service stations located in Tampines, Pasir Ris and Lakeview will offer the fastest electric vehicle (EV) charging speed across service stations in Singapore, using electricity from 100% certified renewable sources locally, including the solar panels at the rooftop of these stations.
