read more. Integrated solar street lights consists of high efficiency solar panels, long life lithium batteries, LED of high light effect, intelligent controller and PIR motion sensor. read more.

How does heisolar street lighting work?

Every HeiSolar solar-powered street lighting system comes complete with a self-contained solar power assembly sized to run the specified solar light fixture as per the requirements set by the customer.

Do solar street lights work for the UN project?

We supplied thousands of solar street lighting systems for the UN project in past years. For commercial solar lighting, it must be with a high spec of LiFePO4 battery and a solar panel that can ensure light works at 100% brightness for 12 hours. Only with real high specification, the light can work well even in winter or on cloudy days.

Solar Street Light Dual System
