

# **Solar automatic sprinkler with water pump**

## Overview

---

What is solar powered automatic sprinkler irrigation system?

The “Solar Powered Automatic Sprinkler Irrigation System” was implemented and found to be feasible and cost effective. It is advantageous over manual control as it uses time-based control mechanism.

How a solar powered automatic irrigation system irrigates a farm?

In the field of Agriculture, the importance of automatic irrigation control system cannot be overemphasized. The project presents the design and implementation of "Solar Powered Automatic Sprinkler Irrigation System" that irrigates a farm by switching a DC water pump based on the set-time and the time interval programmed into the microcontroller.

Can solar power be used with sprinkler irrigation systems?

Integrating solar power with sprinkler irrigation systems offers a sustainable and cost-effective solution for modern farming. Solar panels provide the necessary energy to operate the pumps, reducing reliance on traditional energy sources and lowering operational costs. Solar panels convert sunlight into electricity through photovoltaic cells.

How a sprinkler system works?

The sprinkler is used to spray water in the irrigation field for reducing the usage of water consumption. The photo-voltaic (PV) technology used for producing electricity is used to operate the motor used for solar pump.
