

Solar container lithium battery 21700 battery pack

Overview

What is a 21700 battery?

A 21700 battery is a high-capacity, rechargeable lithium-ion cell designed for superior energy efficiency and performance. With a standard size of 21mm in diameter and 70mm in length, these batteries were developed as a next-generation improvement over 18650 cells, offering increased power output, extended runtime, and higher energy density.

What is the difference between protected and unprotected 21700 batteries?

Protected 21700 Batteries: Feature an integrated protection circuit to prevent overcharging, over-discharging, and short circuits. These are slightly longer than standard 21700 cells. **Unprotected 21700 Batteries:** Designed for battery packs or high-performance applications where external battery management systems (BMS) handle protection.

What is a CMB 7s lithium battery pack?

CMB's 7S 25.2V lithium battery pack utilizes high-performance 21700 cells, offering superior energy density, excellent cost-effectiveness, and an extended cycle life. Compared to traditional 25.2V 18650 battery packs, these advanced power solutions are emerging as the preferred choice in the market.

How much power does a 21700 mAh battery hold?

You don't really notice the size increase, but you definitely feel the performance upgrade. At its core, a single 21700 cell usually holds 4000-5000 mAh with a nominal voltage of 3.6-3.7 V. Fully charged, it hits 4.2 V, and cutoff usually happens around 3.0 V.
