

# **Solar container outdoor power installation in Southern Europe**

## Overview

---

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lays flat on the ground.

Can a balcony Solar System be installed in Switzerland?

In Switzerland, balcony solar systems are treated as regular electrical devices. Systems up to 600 watts can be installed without special permission, though they must be registered with the local energy supplier. The Netherlands has a favorable environment for balcony solar, with systems up to 1000 watts allowed without special permits.

How many households can a solar Container Supply?

Based on an average power consumption of a 4-person household of 4000 kWh per year and a location in Southern Germany, the solar container can supply approx. 32 households with climate-friendly electricity. At a location in Southern Europe it can even be up to 50 households due to the high solar radiation.

Where do balcony solar systems come from?

The concept of balcony solar systems gained traction in Europe around 2013, with Germany leading the way. Since then, the idea has spread rapidly across the continent, finding particular popularity in countries like Austria, Switzerland, and the Netherlands.
