Solar energy storage in Southern Europe

Overview

What is the European energy storage inventory?

A new interactive platform delivers real-time clean energy storage insights as Europe shifts toward sustainable energy sources. Energy storage helps to balance supply and demand. The European Energy Storage Inventory is the first of its kind at European level to show all forms of clean energy storage solutions.

What is Solarpower Europe?

PV trade body SolarPower Europe is celebrating its 40th anniversary with the tagline SolarPower Europe: solar, storage, and flexibility, and has announced plans for a Battery Storage Europe platform to highlight case studies and regulatory best practice.

Does Europe need co-located solar?

Ingeteam's Mauro Rivola discusses the rapidly growing appetite for co-located solar and storage in Southern Europe. Solar power generation in Central Europe has grown at more than twice the EU average rate since 2019, according to new figures.

Which countries have the most storage facilities in Europe?

Europe's current total operational power is around 66 GW, and planned projects mean this might double to 132 GW by 2035. According to findings from the inventory, Germany, Italy and Spain have the main relevant storage facilities among the member States.

Solar energy storage in Southern Europe
