

Solar glass function and price

Overview

What are PV solar cell glass price developments?

This post is a summary of the PV solar cell glass price developments. The price developments of PV solar cell glass are expressed in US\$ prices converted FX rates applicable at the time when the price was valid. PV solar cell glass price index developments are calculated from multiple separate sources of data to ensure statistical accuracy.

What is solar glass?

Solar glass is a specific kind of glass that is intended to collect and produce solar energy. It is sometimes referred to as photovoltaic glass or solar PV glass. It is utilized in many solar applications, particularly solar panels and building-integrated photovoltaics (BIPV).

What is solar PV glass & how does it work?

Photovoltaic cells are integrated into solar glass, enabling it to convert solar radiation into electrical power. Government rules that are favorable to the development of solar PV plants is one of the factors driving the growth of the solar PV glass market.

How much does solar glass cost in China?

The average price of 2.0 mm solar glass increased CNY1 to CNY 13.5 per square meter, up 8% from last week. Meanwhile, 3.2 mm solar glass climbed CNY 2 to CNY 22.5 per square meter, a 9.8% rise. Xinyi Solar has reported CNY 21.92 billion of full-year revenue for 2024, down 9% year on year.
