What is solar glass?

Solar glass is a specific kind of glass that is intended to collect and produce solar energy. It is sometimes referred to as photovoltaic glass or solar PV glass. It is utilized in many solar applications, particularly solar panels and building-integrated photovoltaics (BIPV).

What is Solar Photovoltaic Glass?

The technique known as solar photovoltaic glass makes it possible to convert light into electrical power. Transparent semiconductor-based photovoltaic cells, or solar cells, are integrated into the glass. These solar rays can be captured by these cells and turned into power since they are encased between two panes of glass.

How many tons of glass a year?

As of now, the domestic glass capacity is about 99,000 tons, plus 5,850 tons overseas. In Q1 2024, the industry added 3,100 tons of new capacity and 650 tons of resumption. Considering about 3,500 tons of repair, the actual increase in Q1 is limited. Q2 is expected to increase, with capacity expected to be concentrated in Q3-4.
