

Solar oxygenation water pump

Overview

What is a solar water pumping system?

A solar water pumping system is a technology that converts sunlight into electricity to pump water. The PV panels are then connected to a motor (DC or AC) which converts the electrical energy supplied by the PV panels into mechanical energy, which is then converted to hydraulic energy by the pump.

What are the features of aquarium air pump 2022?

2022 Upgraded Aquarium Air Pump:3 different modes:Intermittent mode,Continuous mode, Energy-saving mode.The two air flow outlets make the air distribution more even and pervasive. Solar Powered & Battery Backup:Comes with an extremely competent solar panel, making it an energy-saving and environmentally friendly product.

How to install a water pump?

Compact & Easy Installation:Just put the air stones in the water,and install the solar panel,the pump will start to work in a couple of seconds once exposed to sufficient sunlight.With compact size and light weight,it is convenient to move or carry around,especially for fishing.
