# **Solar panels and solar panels are cheap**

## Overview

---

Are cheap solar panels worth it?

Overall, cheap solar panels are worth it if you can't afford to pay for premium panels. Switching to solar will always save you money, but cheaper panels will typically save you less money than more expensive ones due to their lower efficiency and higher failure rates.

Where is the cheapest place to buy solar panels?

The cheapest places to buy solar panels depend on availability, rebates, and bulk pricing. Some of the best options include: Online Retailers (Amazon, eBay, Alibaba) – Offers competitive pricing and second-hand options. Wholesale Solar Suppliers – Buying directly from manufacturers or distributors saves money.

What should you look for when buying cheap solar panels?

Here are the four main things to look for when shopping for cheap solar panels: Cost per watt: It's easy to get distracted by the total price of a solar system, but the number you should focus on is the cost per watt.

How much do solar panels cost in the UK?

Cheap solar panels in the UK typically cost between £92-£246 per unit, with the average cost of a 350-watt solar panel ranging between £150-£500. Estimate potential solar panel costs and savings based on your location using our solar panel calculator. Cheaper panels, like those from Amerisolar and Longi Solar, range from £92 to £246 per unit.
