

Solar panels in New Zealand

Overview

How much do solar panels cost in New Zealand?

Let's break it down—costs, efficiency, government support, and how to make solar work for you. Yes, solar panels require an upfront investment, but they can deliver significant savings over time. A residential system in New Zealand typically costs between \$8,000 and \$15,000, depending on size and energy needs.

Why should you install solar panels in New Zealand?

Solar panels are a clean and renewable source of energy. By harnessing the power of the sun, we can reduce our reliance on fossil fuels and lower our carbon footprint. There are numerous benefits to installing solar panels in New Zealand. One of the main advantages is the potential for significant cost savings on your energy bills.

How many solar panels do I need in New Zealand?

Figuring out how many solar panels you need for your home in New Zealand doesn't have to be a head-scratcher. It all comes down to your household's energy habits, roof space, and how much sunshine your area gets. Most Kiwi homes opt for systems between 4kW and 8kW, which translates to around 9 to 19 solar panels.

What is solar energy in New Zealand?

Learn about solar energy in New Zealand, and its advantages and limitations. In October 2022, Electricity Authority data showed 43,641 solar systems installed across New Zealand, adding up to 240 MW. This makes up an estimated contribution of under 1% of total electricity consumption.
