

Solar power generation in Cebu Philippines

Overview

Is Cebu a good location for solar power generation?

Cebu City, Central Visayas, Philippines (latitude: 10.3099, longitude: 123.893) is a highly suitable location for solar power generation due to its consistent sunlight exposure throughout the year and distinct wet and dry seasons rather than the traditional summer or winter experienced in other parts of the world.

How much solar power does Cebu City have?

Seasonal solar PV output for Latitude: 10.3099, Longitude: 123.893 (Cebu City, Philippines), based on our analysis of 8760 hourly intervals of solar and meteorological data (one whole year) retrieved for that set of coordinates/location from NASA POWER (The Prediction of Worldwide Energy Resources) API: Average 5.62kWh/day in Summer.

How will a solar power plant benefit Cebu province?

The power plant will provide a steady stream of revenue for the province of Cebu as it collects payment for the lease of its property, percentage shares of revenues from electricity sales, and brokerage fees. CEBU CITY - A 150-megawatt solar power plant will soon rise in the northern tip of Cebu province.

Where is the biggest solar power plant in Cebu?

CEBU Gov. Gwen Garcia (center) leads the groundbreaking for the 150-megawatt solar power plant in Daanbantayan, Cebu. (Sugbo News) The power facility, which is set to be the biggest in Cebu, will be constructed on a 187-hectare, provincial government-owned property in Barangay Talisay, Daanbantayan town.
