

Solar power generation system installed in Cordoba Argentina

Overview

Neuss Cordoba Solar PV Park is a ground-mounted solar project which is planned over 124 hectares. The electricity generated from the plant will offset 89,000t of carbon dioxide emissions (CO₂) a year. Where are solar power plants located in Argentina?

More than half of the country's solar power capacity (766 MW) is located in the northwestern provinces of Argentina, including Jujuy, Salta, Tucumán and Catamarca; another 40% (512 MW) is provided by power plants from the Cuyo region, which encompasses the provinces of San Juan, La Rioja, Mendoza and San Luis in the west of the country.

How much solar power does Argentina have in 2023?

Argentina has sharply accelerated the rate of bringing its solar power plants into operation. According to the national electricity operator CAMMESA, the capacity of photovoltaic panels put on stream nationwide went from 33 megawatts (MW) in 2022 to 262 MW in 2023.

Where is the largest solar PV farm in Argentina?

The installed capacity of solar photovoltaic (PV) energy generation in Argentina increased exponentially in recent years. Data from September 2024 shows that the largest solar PV farm in the country, PS Guanizuil II A Solar PV Park, is located in San Juan province and has a maximum capacity of roughly 117 megawatts. * For commercial use only.

How many solar panel installers are there in Argentina?

Argentine solar panel installers – showing companies in Argentina that undertake solar panel installation, including rooftop and standalone solar systems. 92 installers based in Argentina are listed below. Ing. Alejandro Alvarez
