

South Sudan Energy Storage Power Supply Procurement

Overview

What are the main energy sources in South Sudan?

The most commonly-used energy sources are biomass and petroleum products. Forests, animal wastes, agricultural residues, and sugar cane are all biomass resources in South Sudan. The country's reliance on oil pervades all aspects of the economy, accounting for roughly 72 % of the 700 Ktoe total primary energy supply.

What is the future of electricity in South Sudan?

According to recent projections, in the long term, the demand for electricity in South Sudan could grow to 1400 MW by 2030. In sum, the fundamental challenge for South Sudan is to build new public service infrastructure and refurbish depleted water, energy, transportation, and communication systems.

Why is South Sudan struggling to get electricity?

Despite having an abundance of energy resources, particularly fossil fuels, South Sudan struggles to give its citizens access to electricity. The long period of historical neglect of the region by the Sudanese government before independence and the recent conflict, is the primary cause of the current energy challenges.

What is the trilemma of energy policy in South Sudan?

The Quadrilemma of Energy Policy- the Case of South Sudan. Source: Authors. In short, the South Sudanese scenario thus adds two additional factors to the energy trilemma- the resource curse and the need to consolidate power through national energy projects.
