

South Tarawa undertakes solar inverter installation

Overview

The proposed South Tarawa Renewable Energy Project will install solar photovoltaic and battery energy storage system to help the government achieve its renewable energy target for South Tarawa, reduce consumption of diesel fuel for power generation, and help mitigate climate change by avoiding greenhouse gas emissions through clean renewable energy. Is Kiribati launching a solar PV project?

The Oceania located nation of Kiribati has started construction on the country's largest solar PV project that's backed by the Asian Development Bank and the Government of New Zealand. It will be accompanied by a battery energy storage system (BESS). The 7.5 MW South Tarawa Renewable Energy Project (STREP) is located on the Bonriki water reserve.

Who financed the South Tarawa water supply project?

Supported by the bank and co-financed by the Kiwi government, the project's solar and BESS components were procured under the ADB's South Tarawa Water Supply Project co-financed by the World Bank and the Green Climate Fund.

How will Kiribati transform the energy sector?

The proposed project will initiate and contribute to the transformation of the Kiribati energy sector to one that is low-carbon and adapted to growing climate and natural hazards. It will do this by installing the innovative, climate-adapted and efficient floating PV (FPV) for power generation and for services and benefits beyond electricity.

South Tarawa undertakes solar inverter installation

[Sino Soar Obtains South Tarawa Solar Micro-grid project in ...](#)

Sep 13, 2022 · The installation and debugging of 2.2MW / 2.5mWP solar PV array, inverter and 5MW / 0.5MWh energy storage system are included. The third part is the 12-month operation ...
