

Southeast Asia Public Mobile Energy Storage Site Wind Power

Overview

Is Southeast Asia a bright spot for the offshore wind industry?

(AP Photo/Chitose Suzuki, File) HANOI, Vietnam (AP) — Southeast Asia is a bright spot for the embattled offshore wind industry as it reels from U.S. President Donald Trump’s push against renewable energy. The White House’s policy pivot has thrown billions of dollars’ worth of U.S. offshore wind projects into turmoil.

Why is wind energy reshuffling in Southeast Asia?

Industry interest and investment are looking elsewhere, and developing regions with ample wind resources, like Southeast Asia, have the most to gain from this likely reshuffling, analysts say. Wind energy is essential to efforts to curb climate change, scientists say, as global temperatures drift perilously higher.

Does ASEAN have wind power?

The 11 member states of the Association of Southeast Asian Nations, or ASEAN, a vast region that includes tiny Brunei to populous Indonesia, have no installed wind power capacity. So there’s a lot of untapped potential up for grabs, said Amisha Patel, with the Global Offshore Wind Alliance, an organization of countries promoting offshore wind.

Is Asia a good place to invest in offshore wind?

“Asia is looking very, very attractive because of the momentum that we’re seeing there and the core understanding of the value of offshore wind,” Patel said. The Philippines and Vietnam have an early advantage.
