

Syria s energy storage sector distribution

Overview

Why is Syria rehabilitating its energy sector?

The rehabilitation of Syria's energy sector has emerged as a top priority for the Syrian Transitional Government (STG) as it works to restore essential services, stabilize the economy, and pave the way for national reconstruction.

What happened to Syria's energy infrastructure?

A Heavy Legacy of Destruction The war has left Syria's energy infrastructure in ruins. Damaged oil and gas fields, power plants, and transmission lines have exacerbated a severe electricity crisis. Losses to the electricity sector alone amount to an estimated \$40 billion, according to former regime officials.

Does Syria have a good energy supply?

The lack of reliable energy supplies is a major concern for Syrian citizens and its new government. Syria's oil and gas sector is in an even worse state. Before 2011 the country was an oil exporter producing 400 000 barrels of oil per day. Today, it scarcely produces 20 000 and relies on imports.

Is Syria's energy system in ruins?

Syria's energy system is in ruins. To rebuild energy security the country's new government faces two major challenges. The first, vital for Syria's swift recovery and political stability, is bringing reliable flows of electricity and fuel to its people.
