# Tempered glass solar modules

## Overview

---

Do PV modules have tempered glass?

Among the current module products on the market, only single-glass modules are equipped with tempered glass. The choice of front and shear materials is critical in determining the module's ability to withstand hail impacts. Over the past decade, the PV industry has experienced a great revolution.

Why is tempered glass used in solar panels?

Its use of tempered glass enhances its ability to withstand environmental stresses and protect the underlying photovoltaic cells, ultimately contributing to solar energy systems' overall efficiency and reliability. 02/ Why Solar Panel Cover Glass (Hail Resistant Cover Glass) is Needed?

What is Targray solar glass?

Targray supplies solar PV glass materials engineered to enhance the conversion efficiency and power output of solar photovoltaic panels. Our product portfolio features tempered, ultra-clear solar glass solutions with anti-reflective coating that diminishes reflectivity and improves light transmission.

Why should you choose glass in a PV module?

The choice of glass in a PV module has become a key consideration in efforts to improve durability in the face of extreme weather conditions.
