

The energy storage power station built in Johannesburg South Africa

Overview

Who is delivering battery energy storage systems in South Africa?

Envision Energy, a leading global provider of energy storage solutions, has secured a major contract with EDF Group to deliver three battery energy storage systems (BESS) in South Africa. These systems, with a total capacity of 257 MW and 1028 MWh, represent the largest battery energy storage order in the country.

Why is battery storage important in South Africa?

In South Africa, battery storage is increasingly seen as a key pillar to help provide grid stability and integrate variable renewables given its ageing coal-fired power fleet and grid.

How long has the Kenhardt power station been operational?

The Kenhardt Power Station, a landmark project in South Africa's renewable energy landscape, has been operational for one year, powered by BYD Energy Storage solutions.

Where in South Africa is a clean electricity project located?

The project is located 20 kilometers west of Sasolburg in the Free State Province of South Africa. It will provide approximately 300 million kilowatt-hours of clean electricity to the South African national grid each year, offering crucial support in addressing the local power crisis and promoting regional economic and social development.
