

Thimphu solar Panel Power Generation Scheme

Overview

Where are solar panels installed in Thimphu?

The project included the installation of Rooftop Solar PV at Centenary Farmer's Market (CFM) and Ground Mounted Solar Panels at Dechencholing in Thimphu. The first phase of the project completed in May-June, last year.

What is Bhutan Solar Initiative project (BSIP)?

Bhutan Solar Initiative Project (BSIP) aims towards achieving a sustainable energy supply for Bhutan through alternative renewable energy sources of solar grid integration. About 60 De-suups have been actively involved in this six-month long project and have gained practical knowledge of installing solar PV systems through hands-on experience.

Can solar power grow in Bhutan?

"We did the studies on renewable energy management master planning in 2016 and the reports say Bhutan has a capacity for 12 Giga watts of solar energy and 760 MW of wind so we have a lot to tap as there is a lot of opportunity for solar energy solar power to grow in Bhutan. There is a lot of potential and I think this is the right step."

How much electricity is generated at Dechencholing Pema Dechen/Thimphu?

The Dechencholing plant is expected to generate an annual electricity of 835,000 Units (kWhr) and a revenue of Nu 3.8 million. The panels cover a ground area of 1.2 acres. Soon the solar project is going to have a second phase. 500KV ground-mounted and grid-tied Solar PV project at Dechencholing Pema Dechen/Thimphu
