UK Manchester invests in solar glass project

Overview

Will Oldham's solar farm be sold to a company?

The electricity will initially be sold to a power company, the council have confirmed. The solar farm is the first major clean energy generation project to be constructed as part of Oldham's Green New Deal programme, and the project aims to both reduce the Council's carbon footprint and improve the site in terms of ecology.

What's happening at Oldham's first solar farm?

Charlotte Hall Local Democracy Reporter Work is underway on Oldham's first solar farm, a council-funded clean energy scheme next to the Rochdale Canal in Failsworth. Around 2,700 solar panels are due to be installed on land at Wrigley Head in Failsworth.

How many solar panels will be installed at Wrigley head in Failsworth?

Around 2,700 solar panels are due to be installed on land at Wrigley Head in Failsworth. The project on the 'derelict' 3.5 acre plot, bound by the Metrolink and canal routes, will help make the borough 'more green', create local green jobs, and bring down energy costs, according to the council.

When will a solar farm be built?

The solar farm will be constructed over the next few months by North West-based contractor Vital Energi, who will use local suppliers wherever possible. The facility is due to become operational in spring 2026. We use your sign-up to provide content in ways you've consented to and improve our understanding of you.
