USA New York Energy Storage Project

Overview

What is New York State's energy storage goal?

New York State is targeting the installation of 1,500MW of energy storage by 2025 and 3,000MW of energy storage by 2030 as it closes in on its 100% clean energy policy goal.

How many solar and energy storage projects are there in New York?

Governor Kathy Hochul today announced awards for 22 large-scale solar and energy storage projects in New York. These projects will deliver enough clean, affordable energy to power over 620,000 New York homes for at least 20 years.

Will energy storage improve air quality in New York State?

Doreen M. Harris, President and CEO, NYSERDA said, "Accelerating the adoption of energy storage across the state will allow more wind and solar energy to be integrated into our electric grid, while improving air quality for many communities historically impacted by fossil fuel-generated pollution.

Will New York State become a major hub for energy storage?

Dr. M. Stanley Whittingham, Distinguished Professor at Binghamton University and Nobel Laureate in Chemistry for his development of lithium-ion batteries, said, "The new Energy Storage Roadmap released today will further bolster New York State as a major hub for the energy storage industry.
