Overview

What is a solar power inverter?

Technical terms like "solar power inverter" tend to make people's eyes glaze over, but the idea behind this indispensable device is pretty simple. It turns one type of electrical energy into another. And if you have photovoltaic (PV) solar panels on your roof, that conversion is vital to powering your home.

What does a SunPower solar inverter do?

The SunPower solar inverter does that, allowing the energy to power your home. If you use net metering, the inverter also allows the energy to be fed into the electrical grid. But inverters do more than that. They also provide protection against "ground faults" - basically an exposed or "hot" wire coming in contact with a grounded item.
