## Overview

---

Why are batteries so important in the Netherlands?

Batteries are indispensable for the energy transition. Yet the development of battery projects in the Netherlands lags behind that in other countries. This is because batteries in the Netherlands have to pay to take power from the grid.

Are battery storage spaces getting bigger & bigger in the Netherlands?

After a slow start, the number of large batteries made to store and supply power back to the grid is rising rapidly in the Netherlands. And the capacity of these electricity “parking spaces” is also getting bigger and bigger, NOS reports based on information from Energy Storage NL, the industry association for energy storage.

Who is responsible for battery development in the Netherlands?

Enecogen is responsible for maintenance and operations. The EP NL and Eneco trading departments control the battery. Batteries are indispensable and acceleration is necessary. Batteries are indispensable for the energy transition. Yet the development of battery projects in the Netherlands lags behind that in other countries.

Will Eneco and EP NL invest in a battery storage project?

The storage project will make use of the plant’s existing grid connection. But while making the announcement, the two companies were vocal about costly obstacles in the Netherlands for batteries. Eneco and EP NL have announced a joint investment in a 50 MW / 200 MWh battery storage project at the Enecogen power plant in the port of Rotterdam.
