## V4 battery cabinet

## Overview

---

What is a Tesla V4 cabinet?

Yesterday, Tesla unveiled the V4 Cabinet for the V4 Superchargers. These new cabinets are engineered to utilize maximum energy from the V4 Supercharger stalls to enable even faster charging for Tesla and other EVs. Video: Tesla unveils the new Supercharger V4 Cabinet to boost EV charging.

How efficient is a V4 cabinet?

V4 Cabinet has a 2% efficiency improvement. Superchargers already deliver over 5 TWh/year, 100 GWh/year in waste heat that can be saved. Screenshot: Tesla Cybertruck to unlock 500 kW charging speed using the V4 chargers.

What is the difference between V3 & V4 cabinet?

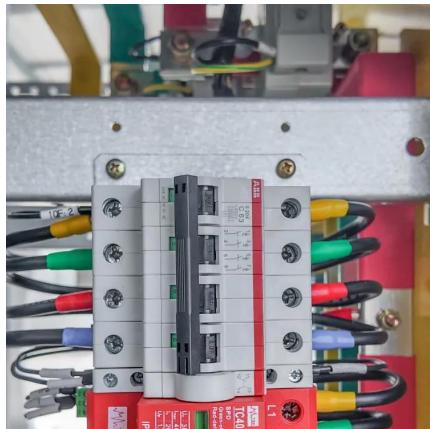

Faster charging: Supports 400V-1000V vehicle architectures, including 30% faster charging for Cybertruck. S3XY vehicles enjoy 250kW charge rates they already experience on V3 Cabinet — charging up to 200 miles in 15 minutes.  
Faster deployments: V4 Cabinet powers 8 posts, 2X the stalls per cabinet.

How much power does a V4 cabinet have?

Although the V4 Cabinet is capable of 1.2MW (1200kW), Max only mentioned 1MW for 8-stall distribution. He wrote on X: Posts can peak up to 500kW for cars, but we need less than 1MW across 8 posts to deliver maximum power to cars 99% of the time. No more DC busbar between cabinets.
