

Victoria Solar Inverter Prices

Overview

How much does a solar inverter cost?

Solar inverters vary quite a bit in price. Micro inverters can start as low as \$195 apiece. String inverters can vary from \$500 to around \$5,000. Meanwhile, hybrid inverters are anywhere from \$600 to around \$4,000. When choosing a system, you'll often have a budget or premium option.

Are Victorians buying bigger solar systems?

If the line is rising in the bottom graph, it tends to indicate Victorians are buying increasingly bigger systems - use the dropdown menu towards the top of the page to zero in on specific system size price trends. To see detailed installation figures for any town or suburb in Victoria, check out our solar in your location tool.

Can I get a solar panel rebate in Victoria?

This rebate is accessible to both existing homes and houses currently under construction. If you apply for a solar panel (PV) rebate and your application is successful, Solar Victoria will pay a portion of the installation cost for a solar panel (PV) system. The current rebate can cover up to 50% of the cost, but is capped at \$1,400.

What are the different types of solar inverters?

The main types include: 1. String Inverters - Cost-effective and ideal for residential use. 2. Microinverters - Higher in price but offer better efficiency. 3. Hybrid Inverters - Advanced technology for grid-connected and off-grid systems. 4. Central Inverters - Used for large-scale commercial solar power systems.
