

# **Victoria solar container lithium battery energy storage inverter company**

## Overview

---

Will Trina Solar build a 1 GWh battery energy storage system in Victoria?

Chinese solar giant Trina Solar has lodged plans to build a 1 GWh battery energy storage system in Victoria as part of a broader strategy that aims to deliver more than 6.5 GW of large-scale renewable energy generation and storage projects across Australia.

Why is Victoria launching a 100 MW battery energy storage system?

Victoria's energy storage network has expanded with the launch of a 100 MW Battery Energy Storage System (BESS) in the Latrobe Valley – a critical step in strengthening grid reliability and supporting the state's renewable energy transition. Image: Tilt Renewables.

Why should Victoria invest in battery & energy storage projects?

The Government strongly supports investment in battery and energy storage projects, ensuring that Victoria remains rich with opportunities for collaboration. With abundant natural resources, skilled talent, and world-class infrastructure, the state is the ideal environment for launching innovative clean energy solutions.

Why is energy storage important in Victoria?

Energy storage is central to Victoria's transition to renewable electricity generation, and this project will play a crucial role in achieving the Government's legislated energy storage targets of at least 2.6 GW of energy storage capacity by 2030 and at least 6.3 GW by 2035.
