

# Vilnius power grid energy storage power station prices

## Overview

---

How many MW will Vilnius Power Plant have?

The total electrical capacity of the power plant will be about 100 MW and the thermal capacity will be about 240 MW. Vilnius combined heat and power plant has been planned taking into account the heat demand in the capital and the situation in the waste and biofuel market.

How much does the EU spend on energy storage in Lithuania?

In late 2024, the EU approved a €180 million (US\$188 million) support package for over 1.2GWh energy storage in Lithuania, covering a maximum of 30% of the projects' capital expenditure costs via a competition auction set to conclude before the end of 2025.

What is the largest 'private' Bess project in Lithuania?

IPP E energija Group has started building what it claims is the largest 'private' BESS project in Lithuania, a few weeks after the Baltic region decoupled from Russia's electricity grid. The 120MWh battery energy storage system (BESS) project near Vilnius, the capital of Lithuania, will come online by the end of 2025.

How much electricity does Lithuania use?

"Although the average electricity consumption in Lithuania is around 1,500 megawatts, the installed capacity of both solar and wind power plants is expected to exceed 2,000 megawatts in 2025, enabling surplus electricity to be stored and supplied to consumers during peak hours", said Gediminas Uloza, CEO of E energija Group.
