

LLSE CONTAINERS

Western Europe solar container lithium battery energy storage project

Overview

How can European policymakers help the battery storage sector?

Recommendations: How can European policymakers help the battery storage sector? Battery storage systems are essential for strengthening the EU's energy security and competitiveness by enhancing flexibility, providing ancillary services to secure the grid, maximising the use of renewable energy, and effectively dealing with energy price volatility.

How many battery energy storage systems did Europe install in 2024?

In 2024, Europe¹ installed 21.9 GWh of battery energy storage systems (BESS), marking the eleventh year of record-breaking annual additions since 2013, when our records began. The latest additions take the total running European battery fleet to 61.1 GWh at the end of 2024.

What is the European energy inventory storage dataset based on?

Please note. Disclaimer: The European Energy Inventory Storage dataset is mainly based on public data and data from Wood Mackenzie. Wood Mackenzie Limited, subject to any additional data modifications and/or input provided by the EC or any of its authorised 3rd party contributor.

What happened to Europe's battery capacity in 2024?

In 2024, Europe added 21.9 GWh of battery energy storage systems (BESS), marking the eleventh straight year of record-setting installations and raising the continent's total battery capacity to 61.1 GWh. However, the annual growth rate declined to 15%—a slowdown following three years of doubling new capacity additions.
