# What are the new energy sites

## Overview

---

What is on-site renewable energy?

On-site renewable energy means renewable energy systems located on the building or building site that produce electricity or hot water for use in the building. This includes solar photovoltaic systems, solar hot water systems, wind energy systems, and fuel cell systems.

What is energy site?

Forgot password?

Need support?

Energy Site is a service for Vattenfall's corporate customers.

Where is Our Next Energy located?

Our Next Energy, also known as ONE, is located in Michigan, the United States. Michigan-based startup Our Next Energy said Thursday it will supply batteries to Shyft Group for its Blue Arc electric commercial vehicles.

Does China have a new energy industry?

In the context of the global energy transition from fossil fuels to renewable energy sources, China's legions of wind turbines and seas of photovoltaic panels are quite eye-catching. China's new energy industry has experienced rapid growth in recent years, maintaining a double-digit annual growth rate.
