

What to do if the battery cabinet does not have batteries

Overview

How do I choose a battery storage cabinet?

Capacity Requirements: Ensure the cabinet accommodates the quantity and size of batteries used in your workplace. **Regulatory Compliance:** Choose a cabinet that meets safety standards for Class 9 Dangerous Goods. **Durability:** Look for a heavy-duty lithium battery storage case designed for long-term use.

How do you store a battery in a fireproof cabinet?

Investing in fireproof battery charging cabinets ensures a secure and compliant storage environment. Store batteries in a cool, dry environment away from direct sunlight. Use a lithium battery charging cabinet to charge batteries safely. Regularly inspect batteries for signs of swelling, leakage, or damage.

How do I remove the battery tray from the battery cabinet?

Remove the front cover from the battery cabinet by loosening the top two captive fasteners and lifting the cover up and out of the battery cabinet. Slide the battery tray out of the battery cabinet until it stops. Place the batteries inside the battery tray oriented as shown in Figure 8. Place the provided spacers between the batteries.

What are the best practices for storing a battery?

Do not charge batteries overnight or unattended. Do not store damaged batteries in a battery storage cabinet. Avoid storing batteries near flammable materials or liquids. Do not overload power outlets when using a cabinet charger. By following these best practices, businesses can significantly reduce battery-related hazards.
