When will Riyadh build a hydrogen energy station

Overview

Why is Saudi Arabia launching a green hydrogen hub in Yanbu?

Saudi Arabia has announced a massive green hydrogen hub in Yanbu to produce 4 lakh tonnes annually, strengthening its position as a global leader in clean energy exports.

How much green hydrogen does Saudi Arabia produce a year?

The plant will produce 400,000 tons of green hydrogen annually, to be converted into ammonia for global export. Haradh Gas Compression Project. (Representational image) Técnicas Reunidas Saudi Arabia is ramping up its green hydrogen ambitions with a massive new facility planned in Yanbu.

What is Saudi Arabia's Hydrogen strategy?

National Hydrogen Strategy: Launched in 2020, this strategy aims for the production of 1.2 million tons of green hydrogen and to capture 10% of the global hydrogen market by 2030. - Export Potential: Saudi Arabia is positioned to be a leading hydrogen exporter, collaborating with international partners in Europe and Asia.

Why should you attend the hydrogen Arabia event?

The upcoming Hydrogen Arabia event will spotlight hydrogen's crucial role and showcase the advancements made in regional projects, including the ambitious NEOM Project. This mega-project is set to host the world's largest green hydrogen facility, underscoring Saudi Arabia's leadership and vision in the hydrogen economy.

When will Riyadh build a hydrogen energy station
