

# **Where is the address of the ASEAN communication network base station**

## Overview

---

What is a base station?

It is a fixed location equipped with antennas and other equipment that receives and transmits radio signals to and from mobile devices, such as smartphones, tablets, and other wireless devices. Base stations are an essential component of cellular networks, providing coverage and connectivity to mobile devices within a specific area or cell.

What is a base station antenna?

The base station antennas transmit and receive RF (radio frequency) signals, or radio waves, to and from mobile phones near the base station. Without these radio waves, mobile communications would not be possible. Radio waves have been used for communication for more than 100 years. Radio and television broadcasting are well-known examples of this.

When did ASEAN become a community?

The roadmap for an ASEAN Community (2009-2015) was declared by the leaders in 2009. The ASEAN Community, anchored on three community pillars: Political-Security Community, Economic Community, Socio-Cultural Community was launched in 2015. The ASEAN 2025: Forging Ahead Together was introduced in 2015 as a Post-2015 Vision.

What is a base station in a wireless network?

At the heart of wireless communication networks are base stations, which act as the gateway between wireless devices and the network infrastructure. Base stations are responsible for transmitting and receiving data to and from wireless devices, as well as managing network resources and ensuring reliable and efficient communication.
