

# **Which is the largest energy storage project in Ngerulmud**

## Overview

---

What is the largest energy storage power station under construction?

Designed with a capacity of 605,000 kilowatts, the project is the largest single energy storage power station under construction in the country. The energy storage station can help send a stable supply of electricity from photovoltaic power facilities to the grid.

Why is Inner Mongolia constructing a new energy storage power station?

[Photo/Xinhua] HOHHOT -- Inner Mongolia Energy Group has started constructing a large-scale new energy storage power station in the Ulan Buh Desert, the eighth-largest in China, to better harness new energy power for grid connection.

Does Dengkou have a photovoltaic power station?

The energy storage power station built in Dengkou boasts photovoltaic power generating facilities with an annual capacity of generating 3.16 billion kWh of electricity, contributing to carbon dioxide emission reduction by 2.75 million tonnes annually while making ecological treatment of about 44,600 mu sand area.

Can a new energy storage power station help fight desertification?

According to the energy bureau in North China's Inner Mongolia autonomous region, in addition to the economic benefit of producing green electricity, the new energy storage power station built in the Ulan Buh Desert hinterland with photovoltaic power generating facilities has ecological and social benefits for combatting desertification.
