What is an uninterruptible power source (UPS)?

An uninterruptible power source (UPS) is an electrical equipment that provides emergency power supply to a electric load when the input power source or mains power fails. A UPS differs from an auxiliary or emergency power system or standby generator in that it will provide near-instantaneous protection from input power.

Why should you use an UPS system in Singapore?

However, in Singapore, like in many places, power disruptions such as blackouts, voltage fluctuations, and power surges can occur unexpectedly, posing risks to our valuable electronics. This is where a UPS (Uninterrupted Power Supply) system steps in as a reliable solution to safeguard against such disruptions.
