# Wind and solar storage corresponding ETF

## Overview

---

The First Trust NASDAQ Clean Edge Green Energy Index Fund focuses on clean energy companies that trade on major U.S. stock exchanges. It holds companies that manufacture, develop, distribute.

What are alternative energy ETFs?

Definition: Alternative energy ETFs are funds that invest in alternative energy companies. The most popular and most common industry in this category is solar energy, although wind, hydroelectric, and geothermal energies are also represented here.

How many wind energy companies does a wind energy fund hold?

It holds two types of wind energy companies: Pure-play companies that get at least 50% of their revenue from wind-related activities (60% of the fund). Diversified companies that have some involvement in the wind industry (40% of the fund). This fund had about 45 holdings in mid-2025, led by the following five:.

How to invest in green energy using exchange-traded funds?

A look at some of the best ways to invest in green energy using exchange-traded funds. Investing in clean energy ETFs gives investors broad exposure to the sector. The top clean energy ETFs diversify across technologies and geographies, reducing risk.

Are solar and wind stocks still a good investment?

Solar and wind stocks still have something to offer despite U.S. funding cuts. Despite fading policy focus, clean energy remains key to climate action and a smart long-term ETF investment.
