How MPPT inverter can be used for wind turbine & solar panel?

This inverters have several MPPT inputs could be used for wind turbine and solar panel. A battery bank can be connected on the inverter to store the energy produced by the energy source (wind and solar). The energy will be stored in the battery firstly, then power the load. Extra energy will be transmitted to the state grid.

How do inverters work if there is no wind?

Extra energy will be transmitted to the state grid. If there is no wind in cloudy days, the inverter will converter the energy from battery bank for powering the backup equipments. Aeolos developed solutions for connecting 2 inverters in parallel to combine a bigger inverter, this will save cost for the certificate of bigger inverters.

What type of inverter can be used on Aeolos wind turbines?

It can be used on Aeolos 1kW, 2kW, 3kW, 5kW and 10kW wind turbine system with CTW inverters. The dump load resistance is combined in one box and isolate with the control panel. In the premise of safety, it saves the installation space. Micro Wind Converter and Wind-Solar Hybrid Storage Inverters Micro Converter 1kW/ 2kW.
