Yerevan Vanadium Flow Battery Company

Overview

What is a vanadium flow battery system?

Vanadium flow battery systems are ideally suited to stabilize isolated microgrids, integrating solar and wind power in a safe, reliable, low-maintenance, and environmentally friendly manner. VRB Energy grid-scale energy storage systems allow for flexible, long-duration energy storage with proven high performance.

Are vanadium flow batteries safe?

While some flow batteries use two different chemicals for the positive and negative sides of the battery, vanadium flow batteries use the same electrolyte on both sides of the battery. This means the batteries are safe and reliable, and there is no harmful corrosion or degradation over time.

What are vanadium redox flow batteries mainly used for?

Due to their relative bulkiness, vanadium flow batteries are mainly used for grid energy storage. Also known as the vanadium redox battery (VRB), the vanadium redox flow battery (VRFB) has vanadium ions as charge carriers.

Who manufactures vanadium redox batteries?

A company that is recognized globally for manufacturing vanadium redox batteries (VRBs) is VRB Energy. Majority-owned by Ivanhoe Electric, a subsidiary of I-Pulse, VRB Energy is credited with developing the world's longest-lasting VRB. Their products are reliable, recyclable, safe, and scalable.
